Leadership

I'm Udith Sandaruwan, a proactive BSc Software Engineering student at the National Institute of Business Management (NIBM), also certified as a web developer from the University of Moratuwa. Passionate about crafting innovative web solutions using Python Flask and WordPress, I am committed to driving positive change through technology. Eager to connect and collaborate, I thrive on challenges and am dedicated to excellence in software engineering.

WORK EXPERIENCE

Wordpress web Developer 2023 - 2024

Assetcate.com

As a WordPress web developer at Assetcate.com, I specialized in creating and optimizing blog sites. My role involved crafting visually appealing and functional websites using WordPress, tailoring each project to meet the specific needs and preferences of clients. Additionally, I implemented SEO strategies to ensure that the blogs gained visibility and traction online, maximizing their reach and impact.

Wordpress web Developer 2023

Mooverly | Anuradhapura

As a WordPress web developer at Mooverly in Anuradhapura, I specialized in crafting e-commerce solutions. My role involved designing and developing dynamic online stores tailored to meet the diverse needs of clients. Collaborating closely with clients, I ensured a deep understanding of their requirements, translating them into user-friendly and visually appealing websites. From B2C to B2B and C2C platforms, as well as online marketplaces, I navigated through various business models to deliver seamless online shopping experiences.

ACADEMIC PROJECTS

Back-end developer | Database Administrator 2023

Vision Optical - Diploma Final Project

As a back-end developer and database administrator for Vision Optical's Diploma Final Project, I created a streamlined system to manage appointments and showcase services for an eye care center. Leveraging my expertise, I designed and implemented the back-end architecture with a focus on performance and security, while ensuring seamless data management through meticulous database administration. This project highlights my ability to tailor solutions to specific industry needs, showcasing my proficiency in back-end development and database management. (<https://visionoptical.shop/>)

Back-end developer 2024

Million Passes - Enterprise web app

I developed a back-end platform for Million Passes's real world Project, focusing on ticket buying system for events. My role included architecting a scalable system and integrating features for seamless user experience, showcasing my expertise in IT.

EXTRA

Content Writer

Ebrandingbiz | Colombo

As a content writer at Ebrandingbiz in Colombo, I specialize in crafting various types of articles. My responsibilities include creating engaging content across different topics and effectively optimizing it for SEO using WordPress tools. With a keen eye for detail and a passion for delivering high-quality content, I contribute to enhancing the online presence and visibility of the company.

Content Creator And Educator

Youtube | In Class

As a content creator and educator on YouTube and within classroom settings, I specialize in developing engaging educational content. My role involves creating insightful videos that cater to a diverse audience, covering a range of subjects. Additionally, I actively teach these subjects and provide guidance to my team members and peers, fostering a collaborative learning environment. With a dedication to fostering knowledge and facilitating learning experiences, I contribute to the educational landscape both online and offline.
